DEFROST HEATERS

RADIANT DEFROST HEATERS

The Robertshaw radiant defrost heaters are manufactured with heavy-duty VYCOR, glass. The VYCOR glass tubing will withstand severe thermal shock. It also allows heaters to be installed without using gloves. Tubes will not be damaged by touching during installation. The element wire is a special alloy which forms a protective oxide coating which prolongs element life. Multiple tube models are for series applications. All tubes for series applications must be replaced even if only one of the tubes being replaced is burned out.

It is important to select a proper replacement heater by using the cross-reference below, listing the manufacturer's part number. Select a replacement only by part number or by wattage, never by the tube length only. Length specified is measured with glass removed from end caps.

G.E./HOTPOINT TUBE SUPPORTS

*Includes G.E./Hotpoint tube support.
**Both tubes must be installed in series for 115 volt operation.
Includes G.E./Hotpoint tube supports.
†All three tubes must be installed in series for 115 volt operation.
Includes G.E./Hotpoint tube supports.
• Combined wattage.
★ Has straight ends
