

TL

Twist-lock control perfect for outdoor lighting.

500 Series

- Electronic photo transistor
- DC relay
- 2 to 1 ON/OFF ratio
- 220 joule circuit protection
- 10Hpt voltages

TL501

400 Series

- Electronic photo transistor cell
- Bi-metallic switch
- Inverted 0.6 to 1 ON/OFF ratio
- 130 joule circuit protection
- Available for use with 120-227 TL-401-70

TL401

300 Series

- Large 1" CAD sulfide cell to maximize photo useful life
- Bi-metallic switch
- Traditional 4 to 1 ON/OFF ratio
- 130 joule circuit protection
- Available in 120, 208-277, and 480-volt models

TL301

200 Series

- Standard CAD sulfide cell
- Bi-metallic switch with produces 30-45 second delay eliminating unwanted switching
- Traditional 4 to 1 ON/OFF ratio
- 130 joule circuit protection
- Available in 120, 208-277 and 120-277 multi-volt

TL201

TL ACCESSORIES

SC

- Shorting cap provides convenient and economical method to close the primary circuit with a NEMA locking type receptacle
- 1 model fits all applications

TB

- Adaptor bracket
